About Us

SERVICING FILTRATION SYSTEM SINCE 1998

We are one of the leading Industrial Dust collectors Supplying Company Established in jeddah saudi arabia since 1998.

Modern Filters is a manufacturer that produces Industrial dust extraction systems, including industrial vacuum cleaner, dust collector, smoke purifier, welding fume purifier, oil and mist purifier, explosion-proof dust removal equipment, central smoke purification system and so on. The products are mainly used in food machinery manufacturing industry, laser processing, PCB manufacturing industry, pharmaceutical chemical industry, construction industry, cars manufacturing industry, and more than 100 industries.

We are the supplier of offering the integrated solutions of dust removal equipment. These applications including metal processing workshop cleaning; oil and mist treatment, production dust control processing, fume as well as various large central dust purification.

Company Background

Advanced Technical Solutions In Industrial Field

Modern Filters is one of the top-rated industrial dust collectors and industrial dust filtration system manufacturer in Saudi Arabia who have got the foothold in the industrial manufacturing of all types of filtration products for the industrials. We offer improved quality and reliability of the products. Our innovations have reduced the risks of equipment failure and increased the industry's efficiency with the incorporation of technology.

The production unit is equipped with the latest technology and hi-tech machines to enable us to produce range as per industrial standards. All Products are high in efficiency, low noise levels with compact design and easy maintenance. We provide customized solutions to meet unique needs of commercial industry. With the years of experience, we offer consulting, installation and maintenance services in jedddah, Riyadh and dammam, Neom and all regions of Saudi Arabia. With the help of experienced engineers and technicians we work closely with customers to provide comprehensive solutions and support.

We have Years of Experience in Manufacturing Industrial Dust extractor systems in Saudi Arabia

Our Team & Capabilities

At Modern Filters, we believe that our success is driven by our people. Our dedicated team of engineers, technicians, quality controllers, and marketing professionals work tirelessly to ensure maximum client satisfaction.

We manufacture a wide range of industrial filtration products, including:

- Industrial Dust Collectors
- Furnace Smoke Filters
- Bag Filters & Cartridges
- Industrial Dusting Systems
- Industrial Wet Scrubbers
- Odor Control Systems
- Industrial Cyclones
- Smoke & Fume Filters
- Roof Top Fans

With continual investment in modern production technology and high-speed machines, we guarantee high-efficiency products that meet global standards. Our skilled quality control team carefully inspects each production stage, ensuring consistency, durability, and reliability in every product we deliver.

Vision, Mission & Values

Why Choose Us

Partner with Modern Filters and benefit from unparalleled expertise, innovative solutions, and unwavering support.

EXPERTISE & YEARS OF EXPERIENCE:

A proven track record in industrial filtration.

CUSTOMIZED INDUSTRIAL SOLUTIONS:

Tailored systems for consulting for unique challenges.

END-TO-END SUPPORT:

Comprehensive service from consulting to ensuring the highest product quality.

SKILLED QUALITY CONTROLLERS & STRICT STANDARDS:

Extensive reach and local support.

Which Service Do You Need?

Maintenance

Modern Filters provide an SLA (Service Level Agreement) which is scheduled for the cleaning of filters and changing any hardware needs. Monthly checkups and yearly upgrades are considered in SLA.

Consultation

You can hire us without any pay for consulting the best environment machinery and accessories to keep your business air clean and without any dusts.

Cost Effective Solution

As we are dealing with several products we have our own manufacturing warehouse in which we can manufacture your need with the best cost.

Modern Filters is more than just a manufacturer — we are a complete solutions provider for industrial air filtration. We proudly supply filters, dust collectors, and complete filter units across Dammam, Jubail, Riyadh, Jeddah, NEOM, and throughout the Middle East and worldwide.

Maintenance & SLA:

Scheduled cleaning, filter replacement, and yearly system upgrades under Service Level Agreements.

Consultation:

Expert advice to select the right environment machinery and accessories for a dust-free, clean workspace.

Cost-Effective Solutions:

With our own manufacturing facility, we design and produce customized filtration systems at the most competitive cost.

Installation & Support:

End-to-end service from product design to on-site installation and after-sales support.

Industrial Dust Collector

Our flagship product, the Industrial Dust Collector, is designed to capture and control airborne dust in industrial environments. Built with advanced filtration technology, it ensures clean air, improved worker safety, and compliance with environmental standards.

HVAC

Modern Filters provides reliable HVAC systems that ensure proper heating, ventilation, and air conditioning for industrial and commercial spaces. Our solutions are designed for energy efficiency, clean air circulation, and consistent climate control.

Features:

High-performance air handling units

Energy-saving and low-maintenance design

Integrated with advanced filtration for cleaner air

Custom solutions for industrial, commercial, and residential projects

Industrial Wet Scrubbers

Our Industrial Wet Scrubbers are designed to remove dust particles, fumes, gases, and chemical pollutants from industrial exhaust streams using liquid-based filtration. They ensure cleaner air emissions, compliance with environmental regulations, and a safer workplace.

Features:

High efficiency in capturing fine dust & gases

Corrosion-resistant, durable construction

Energy-efficient and low maintenance

Customizable designs to suit different industries

Commercial Kitchen Hoods

Modern Filters provides high-efficiency commercial kitchen hoods designed to extract smoke, grease, and odors from cooking areas. Built with durable materials and advanced filtration, our hoods improve air quality and maintain a safe, hygienic kitchen environment.

Features:

- Stainless steel construction for durability
- High suction capacity with low noise operation
- Easy-to-clean design
- Integrated grease filters and optional UV filtration

Smoke & Fume Control Ecology Units

Our Ecology Units are specialized filtration systems engineered for the removal of smoke, oil mist, grease, and odors from kitchen exhaust or industrial fumes. They provide environmentally friendly, quiet, and efficient operation to meet health and environmental standards.

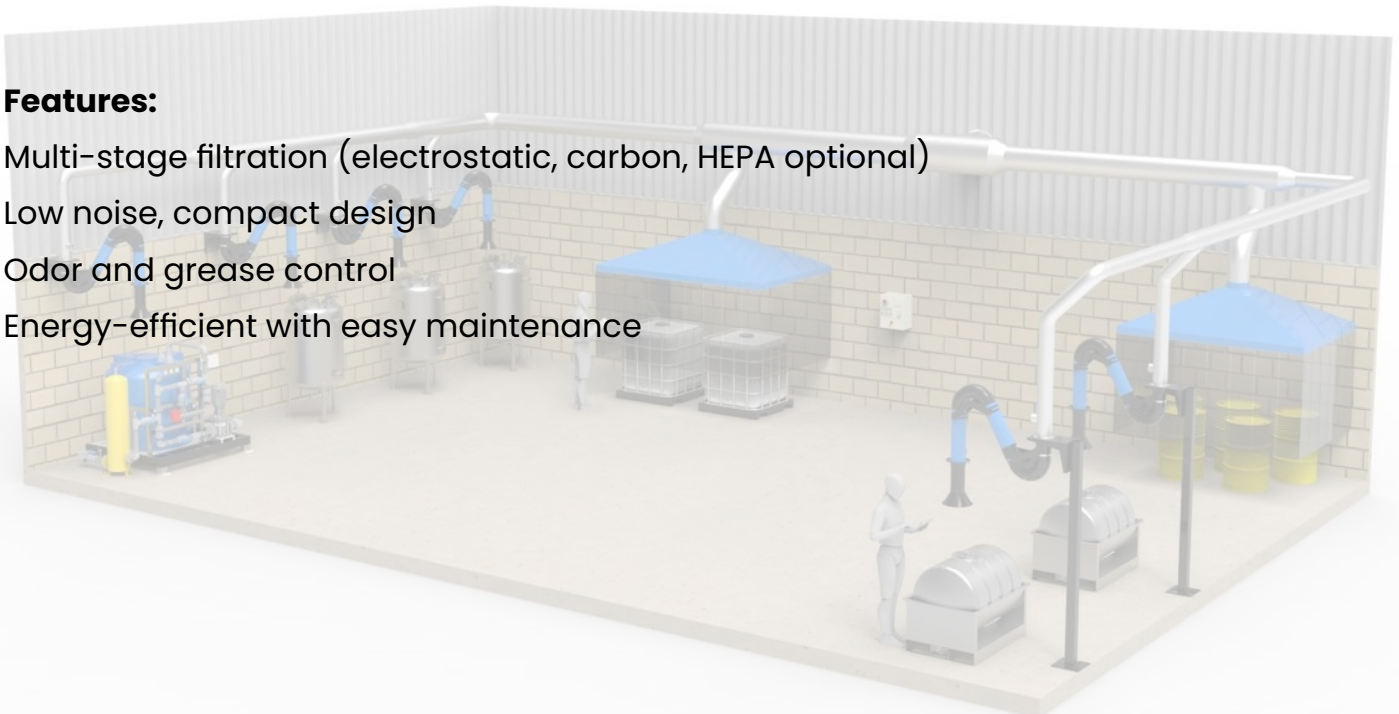

Features:

Multi-stage filtration (electrostatic, carbon, HEPA optional)

Low noise, compact design

Odor and grease control

Energy-efficient with easy maintenance

Industrial Odor Control Systems

Modern Filters designs and manufactures advanced odor control systems that neutralize and eliminate unpleasant smells caused by industrial processes. Using activated carbon, chemical scrubbing, and biological filtration technologies, our systems ensure compliance with environmental standards while creating a safer and healthier working environment.

Features:

- High-efficiency odor removal technology
- Customizable for different industries
- Low energy consumption & low maintenance
- Compact and modular design for easy installation

Industrial Fans

Modern Filters offers a wide range of industrial fans engineered for efficient air movement, ventilation, and dust control. Built for durability and performance, our fans are suitable for demanding industrial environments where reliable airflow is critical.

Features:

High air volume with low noise operation

Energy-efficient motors

Available in axial, centrifugal, and rooftop designs

Rugged construction for long service life

Environmental

Modern Filters is committed to providing environmentally responsible air filtration and pollution control systems that help industries reduce emissions and meet sustainability goals.

Our solutions are designed to protect people, processes, and the planet.

Features:

Eco-friendly filtration technologies

Reduced energy consumption

Compliance with global environmental standards

Custom systems for sustainable industrial operations
